PADDY SEPARATOR

GRAINTEC Paddy Separator machine is unique designed makes efficient separation of brown rice and paddy from the mixture based on density differences.

Effectively separates in three distinct varieties: Pure paddy, brown rice and mixture. Suitable to sort all varieties of rice, such as long grain, medium grain and short grain that separates accurately.

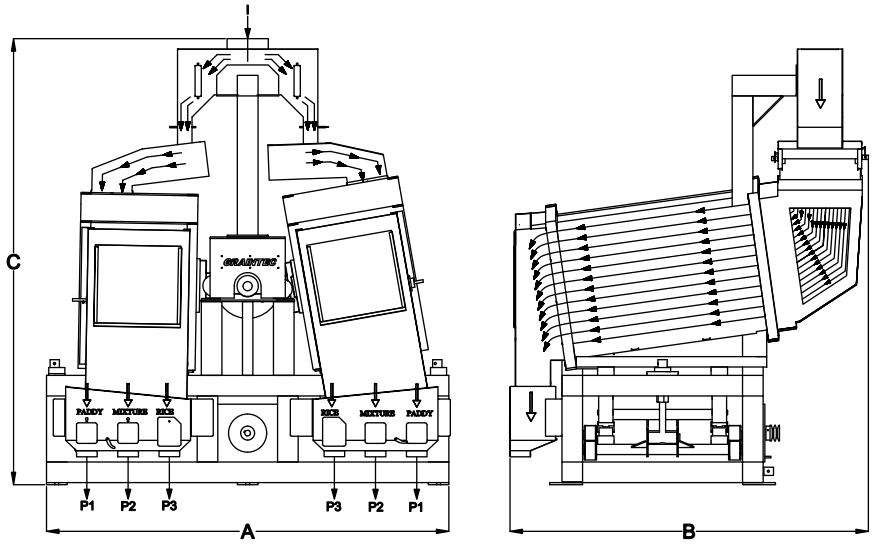

PADDY SEPARATOR

Key Features:

- The paddy separator has a compact and sturdy base frame.
- Double tray bodies are well balanced dynamically.
- Fully automatically controlled panel equipped with VFD.
- Stainless steel trays to minimize wear and tear.
- Simple mechanism to control sieve plate angle.
- Easy to remove and replace sieve frames.
- Sensors for flow indication.

Key Benefits:

- Machine is equipped with both automatic and manual running modes.
- Advanced automation technology easy and reliable operation.
- Tightly insulated and sealed doors.
- Single deck and double deck machines as per capacity.

NOTE: 1-PRODUCT INLET P1-PADDY OUTLET P-3 RICE OUTLET

TECHNICAL SPECIFICATIONS			
MACHINE TYPE		**TSAT - 1D**	**TSAT - 2D**
CAPACITY (TPH)		4	6 - 8
MOTOR POWER - HP / kW		3 / 2.2	3 / 2.2
MOTOR SPEED - POLE / RPM		4 / 1440	4 / 1440
VOLTAGE (V) / FREQUENCY (Hz)		415 / 50	415 / 50
MACHINE WEIGHT (Kg)		820	1155
SIZE (mm)	**A**	1270	1970
	B	1665	1665
	C	2120	2120

All Graintec products are subject to continuous development and as a result, their specification may change and differ from the above mentioned.
